

Porter Quality

Premium Construction Features

All Porter upholstery is crafted to the highest quality standards. We add extra construction and design features for lasting beauty and durability.

Superior Foam Density

1.8 lb. minimum foam quality provides superior support and durability.

Structural Integrity

Each corner of the wood frame is blocked, which provides extra stability.

Quality Tailoring & Durability

Sides and backs are fully reinforced with plywood and foam to keep fabric from stretching and sagging.

Zippers in Back and Seat Cushions

Makes cleaning and fluffing easy. (May not be available with attached seats.)

Luxury Seat Construction

8-Way Hand Tied Seating or Double-Linked S-Spring. Both provide extra stability and strength, adding years to the life of the upholstery.

Extra Spring on Seat Edge (If S-Spring)

An extra spring is added next to every arm to provide resiliency and prevent “rolling” into the arm of the sofa.

4” Vanity Strip Decking

Camouflages unsightly sofa lining for a flawless, tailored look.

Twice the Cushion Support (If S-Spring)

Twice the industry standard, double-linked S-Springs provide extra stability and strength adding years to the life of the upholstery.

Supported Arms

All arms are padded and lined, ensuring optimum comfort at all touch points.

All Wood Frame

Prevents warping and adds strength to the frame.
