

Mango Wood

Fair Trade and Certified Sustainable Wood

Mango is a beautiful, eco-friendly dense hardwood native to South East Asia. All of our mango wood furniture product is harvested through sustainable, fast-growing tree plantations. After bearing fruit for many years, old fruitless trees are cut down and new trees are planted to take their place. Manufacturing wood products from old mango trees also provides an additional revenue for mango farmers, which in turn supports local communities.

Durable and as dense as ash or cherry wood, mango wood has a rich color that varies in tone from deep mahogany brown to tawny tan. It has an elegant, interlocking “tiger’s eye” grain that makes it very sturdy. Our beautiful mango wood timber is kiln dried and treated to ensure a long lasting, durable piece of furniture for your home.
